

Butch Cañada

SOFTWARE DEVELOPER

Software Engineer with expertise in backend, frontend, mobile, AI, and modern web technologies. Experienced in building scalable, secure applications, integrating AI models (OpenAI & Meta Llama), designing REST APIs, implementing authentication systems, and managing NoSQL databases. Skilled in developing Web3 and mobile wallet applications with a strong focus on security, performance, and user experience.

Education

2011 - 2016

CEBU EASTERN COLLEGE

Bachelor of Science in Information
Technology

Skills

- Angular
- Nestjs
- Python (FastAPI)
- Ionic Angular
- Next.js
- MongoDB NoSQL
- PostgreSQL

Experience

Blockspace Corp.

Software Engineer Dec 2022- Present

- Developed Xterium Wallet a cross-platform Web3 wallet using Ionic Angular and Capacitor, with TypeScript and Polkadot API, providing secure Polkadot ecosystem interactions, account management, biometric and PIN authentication, transaction signing, and dApp connectivity.
- Developed Jina AI Chatbot AI-powered chatbots and agents using Angular and Python FastAPI, with MongoDB, integrating AI models (OpenAI & Meta Llama), and Retrieval-Augmented Generation (RAG) to provide accurate, contextual, and domain-specific responses through natural language understanding.

- Developed a mobile point-of-sale system using Ionic Vue and Capacitor, with Vue.js and SQLite, for managing sales, inventory, customers, payments, and business transactions with efficient local data storage and offline support.
- Developed a cloud-based point-of-sale system using Angular and NestJS, with TypeScript, PostgreSQL, and REST API, for managing sales, inventory, customers, and multiple branches, including real-time synchronization of sales data between the Mobile POS and cloud platform.

Human Incubator Inc.

Business Analyst July 2022 - Dec 2022

- Conducted comprehensive product testing to identify defects, deficiencies, and potential areas for improvement, ensuring high standards of product quality and reliability. Investigated quality issues and collaborated with cross-functional teams to implement effective solutions that enhanced product performance and customer satisfaction. Provided technical support for functional and software-related issues, performed root-cause analysis, and contributed to timely issue resolution. Evaluated and identified bottlenecks within quality assurance processes and recommended process improvements to increase testing efficiency, product stability, and overall quality.
